México City

About Me

My career goal is to design and develop impact systems that help companies to improve their opportunities in the market by making them more competitive. In the medium term professional goal I would like to lead a team of developers who have the skills together to be able to create multiple solutions to different problems.

I am very proud of being a truly self-taught person, since my beginnings as a web developer were thanks to the curiosity and perseverance of learning this knowledge as well as my close social circle who always trusted in my abilities.
